SUMMARY

Power Apps Developer with 2 years of experience in building scalable, low-code business solutions using Microsoft Power Platform. Skilled in automating workflows, integrating cross-platform systems, and designing user-centric apps. Delivered key solutions that improved operational efficiency by up to 25% for enterprise clients. Passionate about leveraging Power Automate, Dataverse to drive digital transformation and process optimization.

WORK EXPERIENCE

FPT SOFTWARE 01/2024 - PRESENT

BluescopeSteel ODC (Technical Consultant Leader)

04/2025 - PRESENT

- Contributed to the development of a business management system using Microsoft Power Platform.
- Built and customized Power Pages portal features for customer to submit and track sales orders.
- Developed Model-driven app components to track project progress and automate orders detail workflows.
- Used Azure function and plugin to handle different logic from the app.
- Assisted in setting up Dual-write integration with Dynamics 365 Finance & Operations to keep data synchronized.
- Helped monitor user performance and app stability using Power Platform Insights.
- Deployed ALM using import export function.

Draeger ODC (Technical Consultant)

10/2024 - 03/2025

- Built and configured a Canvas app for customers to submit and track support tickets.
- Used SharePoint to store, organize, and manage customer ticket data.
- Assisted in developing a Model-driven app for support agents to review and resolve tickets efficiently.
- Created Power Automate flows to streamline the ticket approval and resolution process.
- Helped improve overall response time and process efficiency for common customer issues.
- Deploy ALM using Azure Pipeline.

IDECUSA (Technical Consultant)

04/2024 - 10/2024

- Contributed to the development of an interview process workflow using Power Automate and a Model-driven App.
- Helped enhance and streamline recruitment workflows by optimizing data flow and form logic.
- Assisted in configuring Dynamics 365 Dual Write for seamless data integration between Dataverse and Salesforce.
- Participated in system maintenance, error resolution, and feature updates to ensure smooth operations.
- Improved recruiter efficiency and user engagement through continuous process enhancements.
- Deployed ALM using import export function.
